T/D 2000 TITANUS

Bed-scale complete with single sensor weighing system with weight viewer with dedicated programme. Independent electrical movement with pushbutton controls for backrest, footrest, trendelenburg.

The legrest is big enough to permit patients of different sizes to rest on it and use the footrest to prevent cramps with no empty spaces.

Armrest is adjustable in height, position and direction.

Made of fire resistant, non-toxic artificial leather with multiple layers of padding.

All painted components are subjected to special mechanical and chemical treatments and treated with antimicrobial agents.

Wheels with single braking system.
